	ALLAN GIBSON	Description	Seeds per pk	Cost per pk	Species
136	White variegated striata plant (seed ex Nakamura) x self	The berry plant historically produces good white striata variegates.	5	\$20	C. miniata
					
137	Var white striata plant with orange flowers (see ex Nakamura) x a green (Hirao background)	The goal is nice orange variegated plants. The leaves tend to be long and strappy. Goal is a bigger bunch of recurved orange flowers. I am unsure if the flower will be a darker orange and there is some potential for a green centre.	5	\$10	C. miniata
					
138	Var yellow (yellow striata) (Solomon from US background). While it has a good clump of flowers, they are smaller in size. The pollen plant is a large flowering yellow.	The goal is variegated yellow (striata) with good size flowers. From previous years the berry plant produces yellow variegates.	3	\$15	C. miniata
	No photo				
139	Orange Tiger with ghost type petals (emerge orange and turn white after a day or two) x self	The goal is more var orange tigers with ghost flowers. The plant is small growing after 8 years. While I have not selfed this plant before the cross on other miniatas has produced upwards of 30% tiger plants.	5	\$20	C. miniata
					

140	Variegated orange Belgium hybrid (Crystal) x Tiger with ghost orange flowers. Both plants are smaller growing plants.	The goal is good var striata orange plants with tiger. I grew this cross last season and have a bunch of nice striata variegated seedlings with tiger stripes. Each season the berry plant produces some Mandarin Duck plants.	4	\$20	C. miniata
					
141	Var striata orange Belgium hybrid (Crystal) x recurved green (Hirao background)	Goal is striata orange with a dark orange flower and/or a green centred. The berry plant is slower growing.	5	\$20	C. miniata
					
142	Dark orange fading to red x self	Goal is red or dark orange flowers. It is a large growing plant that pups well.	5	\$5	C. miniate
					

143	(Akebono x Emma's Gold) x self. This is an Akebono var with an orange flower.	The Akebono is a good structure with consistent white stripes at the end of the leaves. The seed pods have likewise white tips. Hope is for orange and yellow Akebonos.	5	\$20	C. miniata
					
144	(Anderson's Peach x Jelena) X (Anderson's Peach x Jelena)	From previous years I would expect 100% peach of various shades. The plants have good sized flower heads.	3	\$10	C. miniata
					
KRISTY PIPER		Description	Seeds per pk	Cost per pk	Species
